

Dear ,

Throw away your coupons! We are pleased to announce the start of our battery plan!

Battery plans offer the convenience of receiving batteries through the mail when you need them, ensure that your batteries are always fresh and keep costs current by purchasing them in advance.

Our batteries are manufactured by Rayovac. Rayovac batteries are designed to help ensure that your hearing instrument consistently meets or exceeds the highest quality standards for maximum performance. They have the highest milliamp-hour rating of all hearing aid batteries and their gold plating ensures optimal electrical conductivity and assists in determining the proper insertion of the battery. We are so confident of the quality of these batteries that we will replace any defective batteries purchased from our office within one year of purchase.

Enrolling in the battery plan saves you 10% off our regular retail price. Return the enclosed form at your convenience if you would like to enroll.

Sincerely,  
The Audiology Staff at  
Vernick and Gopal, LLC
